EXPERIENCE / PROJECTS

Accordion Project

- **Duration:** 2 days
- **Objective:** Developed a responsive accordion to provide answers to frequently asked questions on Frontend Mentor.
- **Skills Used:** HTML, CSS, and JavaScript
- **Achievement:** Successfully designed the project to cater to diverse user interactions, including keyboard, mouse, and screen reader accessibility. This marked my first project focusing on a multi-user approach.
- **Challenges:** Initially faced challenges that seemed unfamiliar and difficult, but through persistence and learning, successfully completed the project, achieving a high level of functionality and perfection.

Nexter Project

- **Duration:** 4 days
- **Objective:** Created a user-friendly website allowing individuals to view and purchase affordable homes.
- **Skills Used:** HTML and CSS
- **Achievement:** Successfully designed a responsive image gallery utilizing CSS grid, enhancing the user experience and showcasing available homes effectively.
- **Challenges:** Faced challenges in utilizing CSS grid effectively, but successfully navigated through them, showcasing adaptability and problem-solving skills in implementing grid layouts.

Shopify Dashboard Project

- **Duration:** 7 days
- **Objective:** Developed a Shopify dashboard clone within a limited timeframe of a hackathon on X (formerly Twitter).
- **Skills Used:** HTML, CSS, and JavaScript
- **Achievement:** Successfully created a subtle user interface for the Shopify dashboard clone, showcasing efficiency and creativity within the hackathon's tight deadline.
- **Challenges:** Participated in a time-constrained hackathon with only 2 days remaining for submission. Despite the challenge, took the opportunity to learn and gained valuable experience from the project.
